

RP Drive Technology

	Goal	Achieved
Keyword A: drive technology	4 to 5%	5.3%
Keyword B: drive systems	3 to 4%	5.1
Keyword C: motor drives	2 to 3%	5.6 (in Description)

((H2)) (397 characters and spaces, head and text; 400 max. Must contain keyword A)

Single source drive technologies from the innovative world leader

At Siemens, our drive technology is always a step ahead. We offer innovative, energy efficient, reliable drive systems, applications and services for your entire drive chain. Our drive technology and solutions meet all mechanical and electrical drive requirements — in all industries — with capacities from 100 watt to 100 megawatt.

((H3)) (415 characters and spaces, head and text; 450 max. Must contain keyword B)

Drive systems for greater productivity, energy-efficiency and reliability

From gears, couplings and motors, to frequency converters — our technology solutions for drive systems will ensure maximum productivity, energy-efficiency and reliability for all torque ranges, performance classes, and voltage specifications. Our integrated automation drive systems will enable you to create Motion Control and CNC solutions.

((Description)) (191 characters and spaces; 160 – 200 range. Must contain Keywords A & B.)

World-leading drive technology — Siemens is a professional industrial partner offering comprehensive motor drive systems from a single source for both mechanical and electrical motor drives.
